

Minutes of the March 28, 2014 Water Commissioners meeting Franconia NH Town Hall 8:15 A.M.  
Present: Marcia Graham, Ray Peltier, Mac McLachlin, and Peter Hilton

The Water Commissioners have been looking into switching our water meters to those sold by Badger Meter Inc. We all agree that we have had too many problems with the current meters that were installed in Town, which were sold to us by EJ Prescott. Service has been non-existent and parts and new meters are difficult to obtain. We will install 10 meters in Town and Mittersill which will replace the meters that we are currently using on a trial basis and see how they work. We will change over to the new meters if we find them working well, adding 100 at a time. These meters are stainless steel and warranted for 20 years. They can be read by a hand held radio device and are lead free. Our present metes are not lead free. We are now checking with Towns that are using these new meters. We will keep everyone posted.
