

Minutes of the May 6, 2014 Water Commissioners meeting Franconia NH Town Hall
Present: Marcia Graham, Ray Peltier, Mac McLachlin, and Peter Hilton

The Commissioners voted unanimously to do the trial period with the Badger Water Meters. We will pick 10 locations and start testing them right after the July meter read. If we get positive results from the trial there will be an open meeting for the 10 water customers to discuss our results.

Flushing of the lines was done the week of April 28-May 2, 2014 from 10:00pm until finished. This was a necessary event.

We are going to buy a heat pump/air conditioner for the downtown pump station. This dehumidifier system should prevent the high humidity in the control room from harming our computer.

The two dilapidated buildings which the new Mittersill Pump Station replaced will be removed soon. This process includes capping all pipes that are there.

Much needed work will begin around the Mittersill Inn area. During this work there will be water available for the Inn.
